## PROFILE SUMMARY

A highly skilled React Developer with nearly 4 years of professional experience, specializing in building dynamic and responsive web applications using modern JavaScript frameworks. Currently working at Cognizant as an Associate, I have developed a strong foundation in React.js, Redux, JavaScript (ES6+), and front-end technologies like HTML5, CSS3, and RESTful APIs. I possess hands-on experience in the entire software development lifecycle, from conceptualization to deployment and maintenance.

- Proficient in **React.js** with expertise in building reusable components and optimizing UI for performance.
- Strong understanding of **JavaScript (ES6+)**, including features like promises, async/await, de-structuring, and modules.
- Skilled in using **Hooks** and **React Router** for modern React applications.
- Experience with front-end technologies such as **HTML5**, **CSS3**, **SASS**, and **Bootstrap**, ensuring responsive and accessible designs.
- Integration of **RESTful APIs** to enhance application interactivity and data-driven workflows.
- Expertise in **Git** for version control and **Jira, Azure** for agile project management.
- Familiar with **CI/CD pipelines** for automating testing and deployment.
- Knowledge of **Webpack** and other bundlers for efficient code splitting and optimization.
- Experienced in unit testing using **Jest**.

Throughout my career at Cognizant, I have collaborated with cross-functional teams and stakeholders to deliver high-quality, scalable solutions while adhering to best practices and Agile methodologies.

## TECHNICAL SKILLS

**Library/Frameworks:** React JS, Express JS, Bootstrap, React Redux, React Hook Forms.

**Style Sheet Languages:** CSS3, SCSS, LESS.

**Mark up Languages:** HTML5.

**Programming Languages:** Javascript, Typescript, C.

**Version Control Tools:** GIT.

**Run Time Environments:** Node JS.

## WORK EXPERIENCE

### COGNIZANT-ASSOCIATE | PROJECT-CATERPILLAR-SOS2.0 | OCT 2023 – PRESENT

- Actively contributed to the development of the **Caterpillar SOS 2.0** project, a critical application designed for Caterpillar's machinery maintenance and health analysis.
- Developed and maintained user interfaces using **React.js** and **TypeScript**, ensuring the codebase was type-safe, maintainable, and scalable.
- Implemented complex UI components and ensured seamless integration with the back-end services using **RESTful APIs**.
- Utilized **TypeScript** to enhance code reliability by incorporating static type checking and early detection of potential bugs during the development phase.

- Developed **mock APIs** in an **Express.js** and **Node.js** environment to simulate back-end data and improve the efficiency of front-end development and testing.
- Applied best practices of **React Hooks** (useState, useEffect, useReducer, etc.) to manage state and lifecycle methods, improving component performance.
- Collaborated closely with UI/UX designers and backend developers to translate wireframes and mockups into high-quality user interfaces.
- Followed **Agile** methodologies, actively participating in daily stand-ups, sprint planning, and retrospective meetings to ensure timely project delivery.
- Implemented unit testing with **Jest** and **React Testing Library** to ensure the reliability of key features.
- Used **Git** for version control and code collaboration across teams, maintaining a clean and organized repository.
- Optimized application performance by implementing **lazy loading**, **code splitting**, and other performance best practices using **Webpack**.
- Worked with **CI/CD pipelines** to automate builds, testing, and deployment, streamlining the development workflow.

This role provided valuable experience in developing scalable, efficient, and user-friendly applications using React and TypeScript for a global industry leader.

### COGNIZANT-PROGRAMMER ANALYST-ASSOCIATE | PROJECT-EBAY-INFLOWHELP | SEP 2021 – AUG 2023

- Worked on the **eBay inflowhelp** project for 2 years, contributing to the development of a **widget icon** using **React.js** to enhance user assistance on the eBay platform.
- Focused on building and maintaining React components, ensuring the widget's functionality aligned with project goals and user needs.
- Assisted in deployment processes using **Jenkins** for continuous integration and automated builds, and managed releases to the **eBay cloud platform**.
- Created and documented reusable UI components using **Storybook**, allowing for component isolation and better collaboration with designers.
- Implemented **unit testing** for React components using **Jest**, ensuring the reliability and functionality of key features before deployment.
- Collaborated with senior developers and team members to troubleshoot issues, implement feedback, and ensure smooth operation of the widget.
- Gained in-depth experience in **React.js**, **Jenkins**, **Storybook**, and cloud deployment while developing a solid foundation in web development practices and team collaboration.

## EDUCATION

### VARDHAMAN COLLEGE OF ENGINEERING| B. TECH (ECE) | JUN 2016 – JUN 2020

**CGPA: 8.2**

## ACADEMIC PROJECT

- Successfully designed a **microstrip antenna** with a frequency of **2.4 GHz** (ISM band), commonly used in mobile and smart devices for wireless communication.
- The project focused on optimizing the antenna design for efficient transmission of information within the 2.4 GHz frequency range.

- Achieved a perfect score of **10 points** for the project, demonstrating strong understanding and practical application of antenna design concepts.
- Utilized **IE3D**, a powerful tool for electromagnetic simulation, to model, simulate, and analyze the performance of the microstrip antenna.
